0915 - 1030 Understanding Cultural Safety Through an Indigenous Lens

-a stepping back to understand one's own assumptions, biases, and values, and a shifting of one's gaze from self to others and conditions of injustice in the world.

This Cultural safety session will consider the power imbalances found in the workplace, educational system, and in our own self. Cultural safety is an outcome based on respectful engagement that recognizes and strives to address power imbalances. It results in an environment free of racism and discrimination, where all people can feel safe and included.

This session will focus on deconstructing Myths about Indigenous peoples by identifying and discarding logical fallacies, by being aware of these biases and avoiding them.

Cultural safety seeks to achieve mindfulness by being aware of difference through decolonization, and implementing reflective practice. These include the ability to think systematically and look at and accept other perspectives.

She has published over 175 articles in newspapers and magazines and is coauthor of *Overcoming Compassion Fatigue: A Practical Resilience Workbook*, and *Treating Chronic Pain: Pill-Free Approaches to Move People from Hurt to Hope..*

She has provided hundreds of trainings in all 50 states and internationally. This training will be engaging, interactive, and relevant for those who attend.

0915 - 1545 **The Trauma Triangle: Trauma, Chronic Pain, and Opioid Misuse**

We have ample evidence that trauma, chronic pain, and opioid misuse often co-occur. Each of these conditions has a negative impact on the others, causing distress and impairment to the people we serve. It often looks like a tangled web that leads to frustration for us and for our clients.

Finally, we have treatment tools that work. We can clarify our goals and use effective tools that will lead to a better quality of life for men and women.

In this training, you will learn how to best support those dealing with trauma, chronic pain, and opioid misuse, even when you're presented with all three conditions in one person. You'll be armed with practical and effective tools and will apply evidence-supported approaches that will bring relief to men and women in need.

You'll build your skill base and be able to use cutting-edge, innovative approaches that work. We'll discuss trauma and its treatments, as well as how trauma intersects with both chronic pain and opioid misuse. You'll have a thorough understanding of chronic pain, central sensitization, and appropriate behavioral interventions for pain treatment. You will learn the science of opioids and their impact on people in pain. You will clearly see the overlap between these conditions and build confidence in your ability to help.

We'll also discuss the personal impact of working with those who have trauma, pain, and opioid misuse. Working with people in need can have a negative impact on professionals. Developing skills for managing the risks can help you thrive, not just survive, in challenging work.
